WHO WE ARE

We are the leading vendor of efficient European construction machinery that includes Continuous Mixers, Plastering machines and Conveying systems.

Applications of our machinery include plastering, gluing, reinforcing, grouting, jointing, backfilling, bricklaying, insulating and sealing.

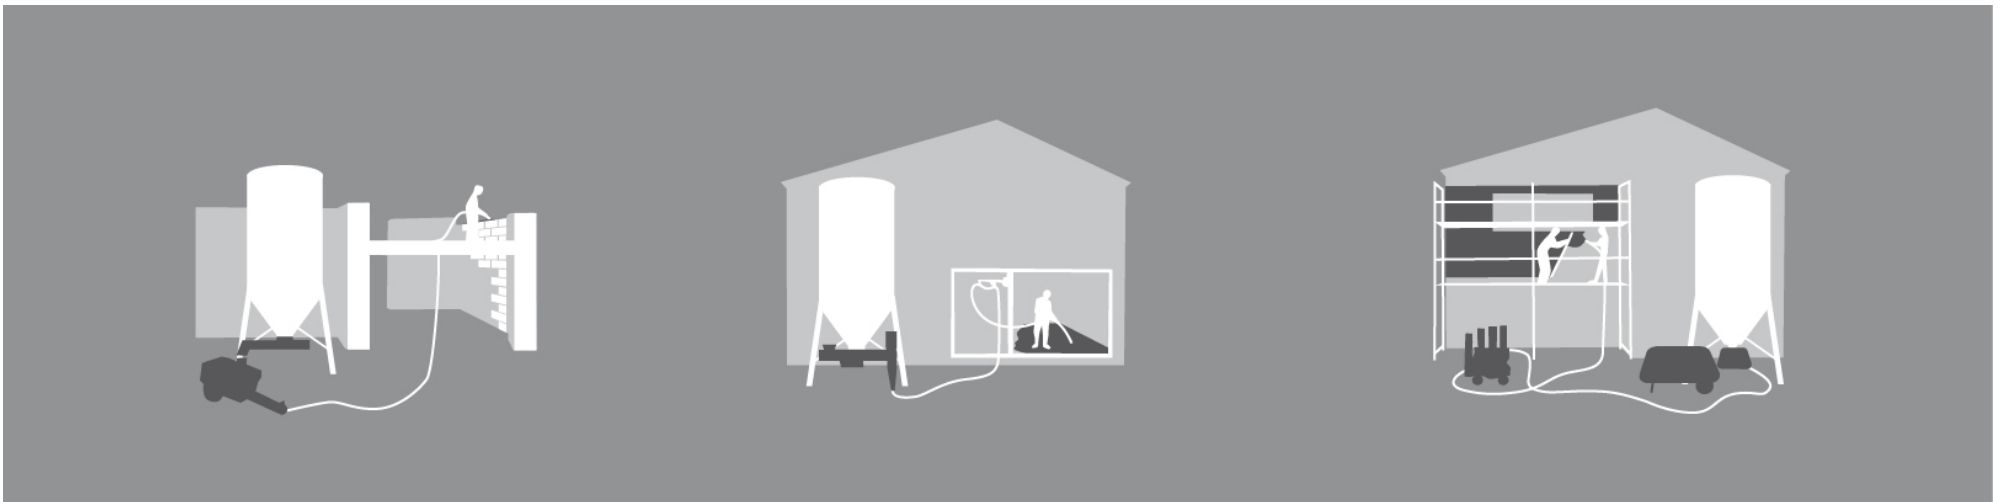

OUR PRODUCTS

Our Products ranges from continuous mixers, plastering/spraying machines and conveying systems to pumping machines.

THEIR APPLICATIONS

Our Products ranges from continuous mixers, plastering/spraying machines and conveying systems to pumping machines.

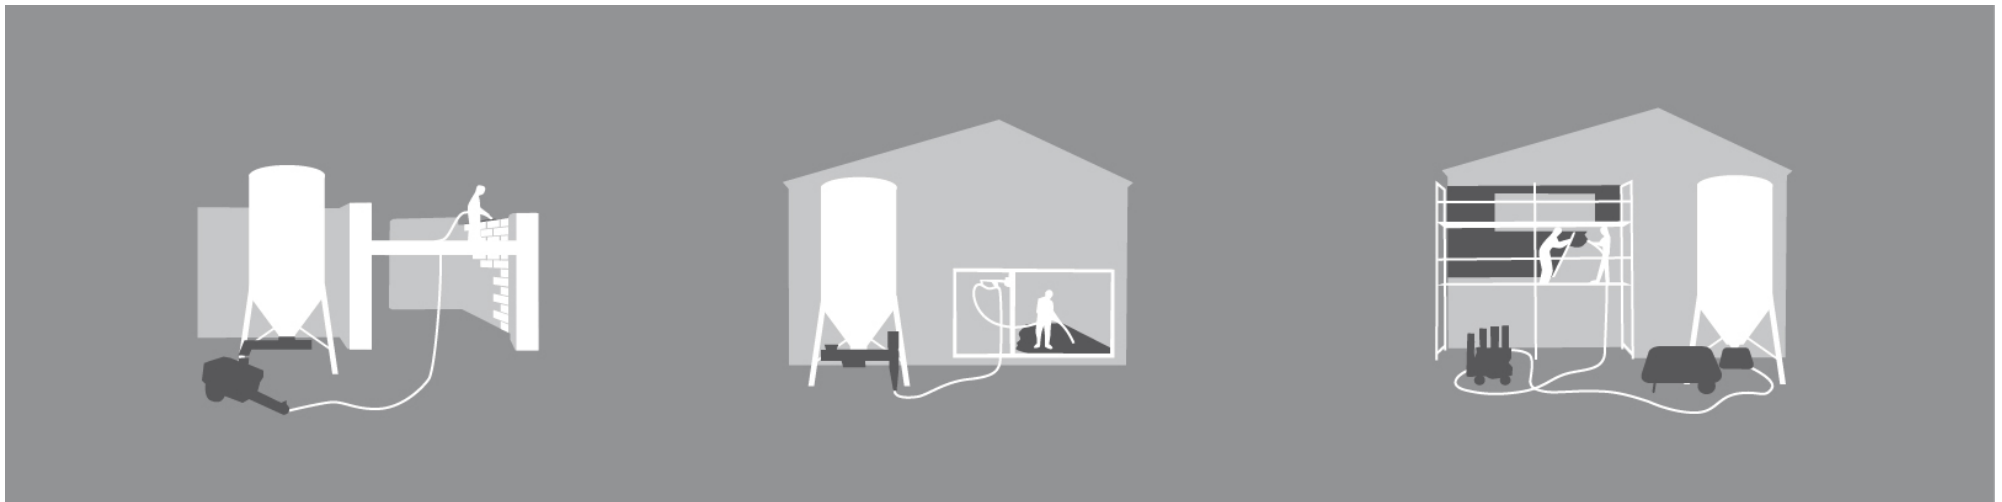

OUR SERVICES

We take pride in the customization of our machines to meet our client's needs, which then fulfills their business goals.

We are a One-Stop shop for servicing, maintenance, troubleshooting, training and spare parts of our machines.

To expedite delivery time of spare parts to our end users, our spare parts warehouse is located in Bangkok, Thailand, the hub of ASEAN.

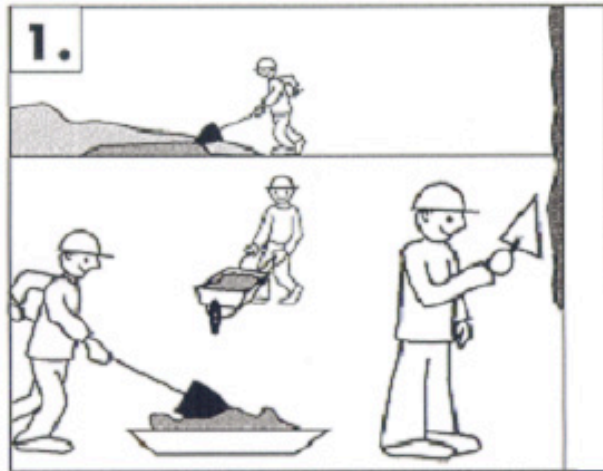

Benefits of Maltech's Efficient Construction Machines + Premixed Mortar

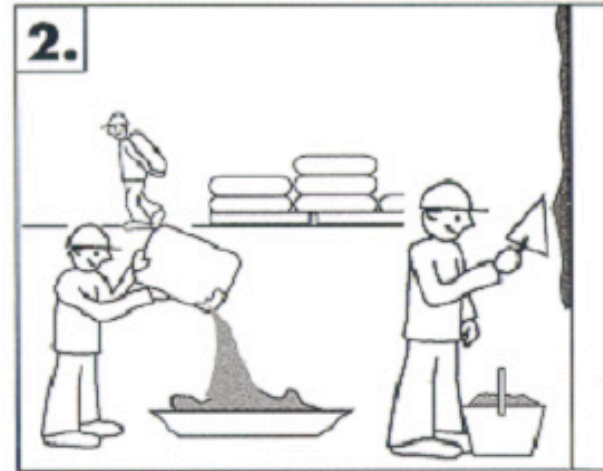

- Reduce Dust Emission
- Reduce Time Sharing of Tower Crane
- Reduce Labor cost
- Reduce Transportation Time
- Reduce waste water from cleaning
- Reduce premixed material cost
- No waste from paper/plastic bag
- Convenient and safe for storage
- No broken bag from transportation
- Protect problem from moisture
- Ease for moving inside or high building
- Mix mortar waste

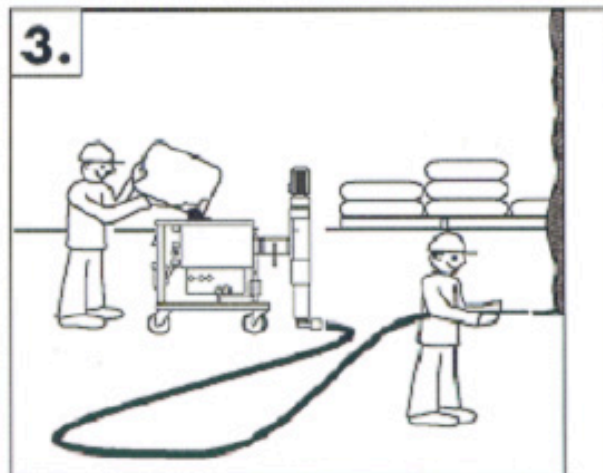

PREMIXED MOTOR PRODUCTIVITY
